PURE PERFORMANCE FREE & EASY *Elite* COLLECTION

THE PERFECT TURN FREE BED, TAILORED TO YOU

Enjoy all the benefits of a restful night's sleep without the need to turn your mattress. Blending luxury with practicality, the Free & Easy Elite Collection offers all the comfort and support you'd expect from a Harrison bed, with the convenience of a turn free mattress.

Because people come in all shapes and sizes, so do our beds. Hand built by skilled artisans, your Harrison bed can be tailored to your preferred length, width and firmness, for a bespoke night's sleep.

THE SLEEP TAILORS

We all love a good sleep, and with good reason. Sleep restores, rejuvenates and makes us feel human again. It powers our dreams and plays a vital role in our health and wellbeing throughout our lives.

But since we all sleep differently, we think beds should all be different too. That's why at Harrison, we tailor ours to the size and firmness of your choice, using the finest natural materials. This is why, whatever kind of sleep you enjoy, there's no better place to enjoy it than a Harrison Free & Easy Elite Collection bed.

You see at Harrison we don't just make beds. We make a great night's sleep.

Our 300 acre farm plays host to our sheep, and an array of wildlife and crops. The perfect place to create a good night's sleep.

OUR BEDS ARE HOME-GROWN

When it comes to the fillings for our beds, only the very best will do. So, to meet our exacting standards for quality there was only one option - we had to grow them ourselves.

At our farm in North Yorkshire that's exactly what we do. Here we rear Texel, Mule, Suffolk and Zwartbles sheep that supply us with pure-grade wool for our fillings; wool that is amongst the thickest, strongest and softest you'll find in a mattress.

All our fillings in the Free & Easy Elite Collection are naturally sourced, from mohair and wool through to the finest cotton and natural latex.

Each mattress contains our natural fillings, some of which are home grown, along with our Ecopad, a mattress filling made from recycled plastic that is fully recyclable at the end of the mattresses' lifetime. These are

perfectly supported by our award-winning spring technology which makes our Free & Easy Elite Collection unique. The springs ensure the natural fillings don't settle and the mattress retains its shape night after night.

Growing fillings on our own farm can take time of course, but it's worth it. After all, we take great comfort from knowing that everything that goes into our luxurious beds is as sustainable as possible, making little impact on the environment. This helps us, and you, rest easier.

LUXURIOUS INGREDIENTS

When we create a Harrison bed we only use the finest natural ingredients in the sleeping surface, each one helping to achieve the ideal balance of comfort and support. It's the perfect recipe for a truly indulgent night's sleep.

WOOL

Soft, springy and naturally supportive, wool resists wear and retains its elasticity over time, making it ideal as a core mattress filling. Adept at wicking away moisture, wool helps to regulate body temperature, keeping you warm and dry as you sleep. It is also antibacterial, anti-static and as it's inherently fire-retardant, there's no need to use chemicals in any of the fillings within our beds.

MOHAIR

Softer, smoother and even stronger than wool, mohair has fine silky fibres that give it a lustrous texture and a luxurious feel. Mohair insulates without absorbing heat and is naturally antibacterial, promoting a fresh, dry sleeping environment. Lightweight, yet surprisingly tough.

COTTON

A biodegradable vegetable fibre harvested from the cotton plant, this material has been used in textiles for thousands of years. Cotton is highly absorbent, it's ability to wick away damp helps to keep you dry and cool, and its robust molecular structure makes it naturally supportive. A highly breathable fibre, cotton has non-allergenic properties that promote a more restful night's sleep.

EGYPTIAN COTTON

The king of cottons. Softer and longer than standard cotton, its super-fine strands are surprisingly strong and resistant to stress, so that it retains its properties over the lifetime of your mattress. Perfect for wicking away moisture, Egyptian cotton is highly breathable yet excellent at holding heat, for an airy sleeping environment in the summer and a cosy one in the winter.

Latex

LATEX

Flexible and supportive, latex moulds its shape around each individual sleeper, preventing 'roll together' and relieving pressure points, providing additional targeted support. Latex is also exceptionally hardwearing, retaining its features throughout the lifetime of the mattress. Naturally antibacterial, anti-fungal and dust-mite resistant, a layer of latex can help allergy sufferers breathe easier for a better night's sleep.

IT’S AMAZING WHAT YOU CAN ACHIEVE AFTER A GOOD NIGHT’S SLEEP

When we make a mattress we don’t follow formulas, we follow our imaginations. Maybe this explains how we came up with our exclusive Revolution technology: an innovative Spring-Within-Spring system that can only be found in a Harrison bed. Our Millennium award-winning technology helps to cradle you in the perfect position. This increases your support, and ensures your good night’s sleep is better than ever.

REVOLUTION. A SPRING THAT LIVES UP TO ITS NAME

Inside every Revolution pocket spring system there’s a little miracle at work - two springs that work as one. It’s a unique system with a small spring sitting inside a larger one, offering two levels of firmness. This gives you variable levels of support depending on your weight, and ensures you always maintain the best posture.

MICROLUTION SPRING

Microlution springs represent the latest advance in mattress technology. Small and supremely resilient, comprising of a tall mini-spring enclosed within a High Density (HD) spring. Layered in their thousands, they contour to the body, keeping the spine in alignment and reducing pressure points. A revolutionary advanced spring system, Microlution springs retain their height and work against the settlement of your mattress fillings. Designed, tested and made from wire drawn and coiled at the Harrison Spinks factory, Microlution springs represent the best in British manufacturing.

AIRFLOW

Airflow does exactly what its name suggests, channelling air through the mattress fillings and directing it to the surface. Perforated spring pockets use each spring’s natural pump action to encourage circulation. This, along with special air vents, helps the mattress to breathe. Keeping the fibres - already resistant to both mildew and damp - fresh and dry whatever the season.

HIGH DENSITY SPRINGS. MORE SPRINGS. MORE COMFORT

The HD spring is a real world first. There are up to 2500 of these in a single layer of a king-size mattress, all made with our lightweight titanium alloy. Smaller in diameter and height, they are highly flexible and work completely independently of one another. This three-dimensional support means they can adapt to your body’s contours more precisely, which in turn relieves pressure and gives greater comfort and lumbar support. They are also good for the layers of fillings, ensuring they always recover to their original position.

TITANIUM ALLOY. LIGHTNESS MEETS STRENGTH

We now make all our HD springs with titanium alloy. These little wonders of engineering have been redesigned to be 40% lighter than before, making your mattress easier to rotate. Since the springs are stronger it makes an already good night’s sleep that much better.

POSTURFIL SPRINGS

The Posturfil spring system comprises of flexible low-height springs encased in breathable pockets for enhanced ventilation. Their small size and light weight make them ideal for use in sheets, which can be layered for a higher spring count. Reacting instantly to the sleeper’s movements, Posturfil springs provide targeted support, relieving pressure on joints and promoting correct spinal alignment.

WEAVING

The secret to the perfect sleeping surface is found at the Harrison Spinks factory in Yorkshire, where our mattress fabric is woven. Here we combine traditional methods with state-of-the-art weaving looms to create naturally breathable fabrics for our mattress ticking.

In line with our eco-friendly approach to bed manufacture, this high-quality woven fabric has a ChemFRee finish. Instead of adding harsh chemicals, the fabric is steam finished to make it fire retardant. An innovative but natural way to top off your sleeping environment.

Our Revolution pocket spring system ensures you always have the correct spinal alignment. What's more, the varying tensions in the spring help to achieve three different levels of support: gently supportive, medium support and firm support. Which you choose is up to you.

JUST RIGHT

When a mattress is just right for you it works with you and supports your body evenly. This alleviates any pressure and keeps your spine perfectly aligned.

TOO SOFT

When a mattress is too soft for you it can put severe pressure on your lower back. It is not only uncomfortable, it can cause stiffness the following day.

TOO FIRM

When a mattress is too firm for you it can create pressure around the shoulders, hips and the knees, causing a restless night.

NOT ALL MATTRESSES ARE CREATED EQUAL

Whether you are standing up or lying down your spine always needs to be aligned. This is because a straight spine puts less strain on your hips and shoulders.

However, since no two spines are the same, at Harrison we make beds that are tailored to you and adapt to the contours of your body. This helps keep your spine aligned no matter what your sleeping position.

To suit the needs of you and your partner, we can even tailor each side of the same mattress to a different level of firmness.

That's why they call us The Sleep Tailors.

PURE PERFORMANCE FREE & EASY *Elite* COLLECTION

Offering exceptional comfort and support, the Free & Easy Elite Collection layers sumptuous natural fillings with resilient Microlution springs. Comprising a tall spring that sits inside a shorter HD spring, this highly advanced spring technology offers targeted support for the lumbar, neck and joints, helping to banish aches and pains.

ChemFRee fabric provides a fire-retardant sleeping environment without using damaging chemicals and the convenient no-turn mattress removes the need for heavy lifting – all you have to do is rotate the mattress from time to time. Designed to your specifications, the mattress can be ordered with one of our supportive bed bases or sit within your own bed frame.

Bedframe: Mackintosh Fabric: Lux Crema

Havana 6200

MATTRESS SPRING COUNT 6200 – CHOICE OF PLATFORM TOP OR 2500 TE BASE FEATURING NATURAL COTTON

Sleep soundly all night, every night, with the superlative support provided by the Havana 6200. A core of 6200 springs is topped with natural cotton and a wool-and-viscose blend to wick away moisture as you sleep, while the ChemFRee mattress fabric offers a natural sleeping surface.

The award-winning Revolution spring-within-a-spring system forms the heart of this turn-free mattress, with layers of advanced Microlution springs sitting close to the sleeping surface to contour to the body and support the joints. The Havana 6200 is available with the choice of a Reinforced Platform Top Base or a True Edge Base with 2500 pocket springs bringing the total spring count to 8700.

Lima 7200

MATTRESS SPRING COUNT 7200 – CHOICE OF PLATFORM TOP OR 2500 TE BASE FEATURING NATURAL WOOL

Natural fillings such as soft cotton, absorbent wool and a wool-and-viscose blend are carefully layered in this luxurious turn-free bed. Topped with a naturally fire-resistant ChemFRee mattress fabric, the fillings help to wick away moisture for a cool, dry sleeping environment.

Three spring systems – Posturfil pocket springs, sturdy Revolution springs and the latest Microlution springs – allow air to circulate through the mattress while providing targeted support for each sleeper. Along with double side stitching, the Lima 7200 mattress is available with either a Reinforced Platform Top Base or with an additional 2500 pocket springs in the True Edge Base allowing the full mattress surface to be used without dipping at the edges.

Rosario 9700

MATTRESS SPRING COUNT 9700 – CHOICE OF PLATFORM TOP OR 2500 TE BASE FEATURING AN EGYPTIAN COTTON AND MOHAIR BLEND

With natural fillings that include soft springy wool, superfine Egyptian cotton and silky mohair, the Rosario 9700 is hard to beat when it comes to breathability and moisture-wicking. The inviting sleeping environment of this no-turn bed benefits from the ChemFree mattress fabric with its naturally fire-retardant properties.

The rest comprising of hard-wearing Posturfil pocket springs, award-winning Revolution springs and the latest in spring technology, the Microlution spring system. Both the Revolution and Microlution springs have spring-within-a-spring technology, which ensures they keep their height throughout the lifetime of the bed.

The Rosario 9700 comes with the option of a True Edge Base which has 2500 additional pocket springs, bringing the total spring count to 12200.

A fine choice of fabrics

Our carefully selected fabrics add the detail to every Harrison bed, and can each be upholstered in a contemporary textile from one of our eight collections. Beautiful textures, a subtle colour palette and delicate designs mean we can tailor the look as well as the comfort of your bed.

Cleaning the easy way

We understand that your bed will go through a lot during its life. It's for that reason that we wanted to provide you with a solution to keep it in pristine condition. Introducing Aqua Clean, exclusive to Harrison. Aqua Clean provides a protective layer enabling you to simply wipe away any marks or stains using a few droplets of water.

Using a damp cloth you can remove accidental marks from your headboard and divan base. Harrison fabrics that have been treated with Aqua Clean allow you to clean away ink, shoe polish, coffee and even scuff marks.

Africa*		Tundra*		Lux*		Tudor House*	Tanami*	Jammu	Linseed	St. Ives
 Serengeti	 Masai Mara	 Sandpiper	 Aurora	 Porcelain	 Indigo	 Enamel	 Cassowary	 Whisper	 Garlic	 Soft Sand

							 Bondi Surf		 Sea Salt	 Tate

* The fabrics within this family benefit from Aqua Clean technology.
Please note that fabrics may be subject to change from time to time as we introduce new fabric options to the range. Please refer to the swatch book instore for exact colour references.

CONTEMPORARY HEADBOARDS

A bed never quite feels complete without a headboard. Our designs range from the latest full height styles, to those with a simple traditional feel and strutted fixings. All in our luxurious range of fabrics.

True Edge

Exclusive to Harrison, True Edge uses a combination of a row of springs on the outer edge of the mattress and a strong supportive timber perimeter to the pocket sprung base; this delivers comfort and support in the sleeping areas as well as durability to the hard working sides of the bed.

Increasing the sleeping surface due to its edge-to-edge support and eliminating the feeling that you may roll or fall, True Edge allows you to benefit from as much room as possible in bed and enjoy an undisturbed night's sleep.

The foundation of a good night's sleep

All mattresses in the Free and Easy Elite Collection now have the option of being partnered with a Deep or Shallow base in either 2500 True Edge or Platform Top.

**2500 TRUE EDGE
SHALLOW DIVAN
(with legs)**

Benefiting from our exclusive True Edge design, this slim divan base features 2500 springs, providing deeper comfort and improving the performance and lifetime of the mattress. The base and complementary headboard can be upholstered in any of the Harrison fabrics. By special request this base is also available as a Reinforced Platform Top Base.

**REINFORCED
PLATFORM TOP BASE
(with inset castors)**

Providing a sturdy foundation for your Turn Free mattress, the Reinforced Platform Top Base offers a smart alternative to bed legs. The base can be upholstered to match your headboard and customised with a variety of storage options.

**2500 TRUE EDGE
DEEP DIVAN
(with inset castors)**

Featuring 2500 springs for a luxury feel, this deep divan base with inset castors is handmade using wood harvested from our own Yorkshire forest. Benefiting from our own exclusive True Edge design and available with four storage options, this choice of base can also be upholstered in a range of fabric choices to match your headboard.

Smarter storage

There is more to our divans than meets the eye. Tucked away are 4 different ways to configure the drawers, with either Standard or Continental drawer sizes.

4 Standard Drawers

2 Standard Drawers

2 Continental and 2 Standard Drawers

2 Standard Drawers (Single)

Storage is not available on shallow divan bases or bed frames.

Bed frames made better

The contemporary alternative to a divan. There are seven low bed frames to choose from and two bed frames with footboards. Each is upholstered with your choice of our luxurious fabrics and you can choose the colour of the legs too. As always, we don't compromise on comfort, which is why each bed frame features a full True Edge pocket sprung base.

HAVE AN AWARD-WINNING NIGHT'S SLEEP

For years we have been crafting beds that perfectly demonstrate our ethos. We combine innovative technology with natural, home-grown fillings wherever possible.

We were already proud of our work, but when it was recognised by HM Queen Elizabeth II, we were delighted. To receive the Queen's Awards for Enterprise in Innovation and Sustainable Development in 2013 and a further two in 2018 for Enterprise in International Trade and again for Innovation, cemented our resolve to continue to produce beautiful, sustainable comfort in every bed.

"The Awards recognise the commitment to excellence that we all share at Harrison Spinks and reflect the fact that innovation and sustainability are at the very heart of our business. We are dedicated to continuous improvement, so we will remain focused on developing products that enhance comfort whenever they can be applied."

Simon Spinks, Managing Director.
